Public Parts Catalog - Navigation Guide

Public Parts Catalog Access

The Public Parts Catalog contains illustrations and parts lists to help you find the right parts for your equipment. You will not be able to order parts from this site. Once you find the parts you need, you can search for and order them on shop.ryanturf.com. If the part you need is not on shop.ryanturf.com, contact the Ryan Team at shopryan@doosan.com

Public Parts Catalog - Navigation Guide

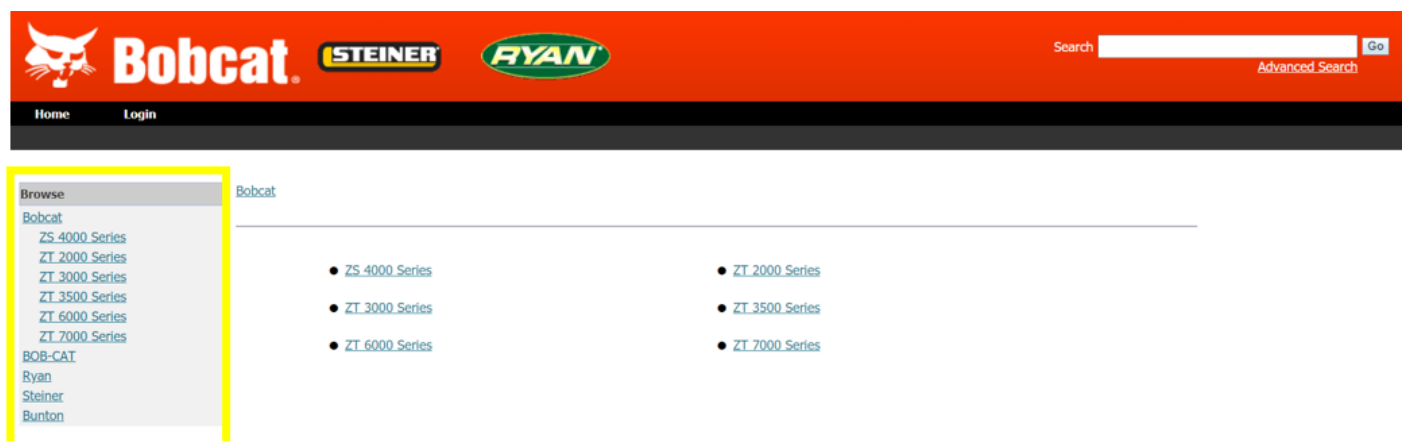

After selecting the Public Parts Catalog Home page should open.

Navigating the Catalog

The following steps describe how to navigate the catalog.

After accessing the Public Parts Catalog choose the link matching the brand you want to access. You should be taken to the main Catalog page if a catalog has been set up against the store.

Some key navigation areas on the site are:

- A navigation tree to the left, giving a listing of all of the product categories for quick navigation. You can drill down through each product section by clicking through the navigation tree or by clicking on the links in the middle section of the page.
- Quick Search and Advanced Search function at the top right of the page.

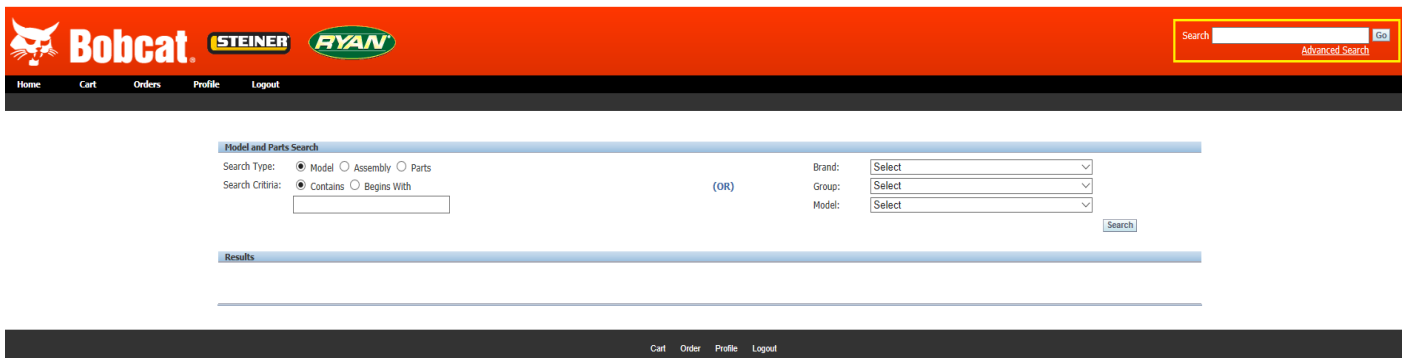

Public Parts Catalog - Navigation Guide

Quick & Advanced Search

The following steps describe how to search for a product.

On home page in the top right corner there is the **Search** window, which can be used for a specific search or by **Advanced Search** to choose specific criteria.

Enter your search term(s) into the free text field and click on 'Go'. You should be taken to the Results page listing all results that match your search criteria.

Searching Tips:

- You can use the % sign if you only know parts of a description or if you do not know the exact writing/spelling of a word. This will display all the description containing this particular criteria. If you enter %295%, this will display all the items containing 295.
- Choose a product category or All Products from the Choose Product drop-down list on the right of the page.
- Enter your search term(s) into the Keyword(s) free text field.
- Click the option button to choose to Match All Word(s) or Match Any Word(s).
- You should be taken to the Results page listing all results that match your search criteria.

If item is “Obsolete” the obsolete icon will appear, see below

Indicates item is obsolete. Please check the item details for reasons and possible replacements.

Public Parts Catalog - Navigation Guide

Making Product Selection

The following steps describe how to navigate to a parts breakdown page.

From the Browse navigation tree, click the Brand and then the product sub-category link for the product you wish to order from.

Public Parts Catalog - Navigation Guide

You will see a list of categories in the top section and a list of documents in the second section. Select the document labeled Parts Manual or PM. This will open up a PDF of the parts manual with illustrations and parts lists. Copy and paste the part number(s) you need into the search field on shop.ryanturf.com to order. If the part you need is not on shop.ryanturf.com, contact the Ryan Team at shopryan@doosan.com
